

THE
SIMON KEITH
FOUNDATION

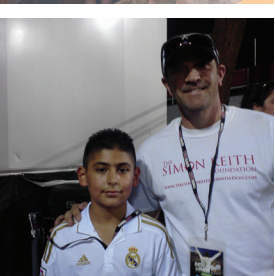

5 YEARS

\$1 MILLION

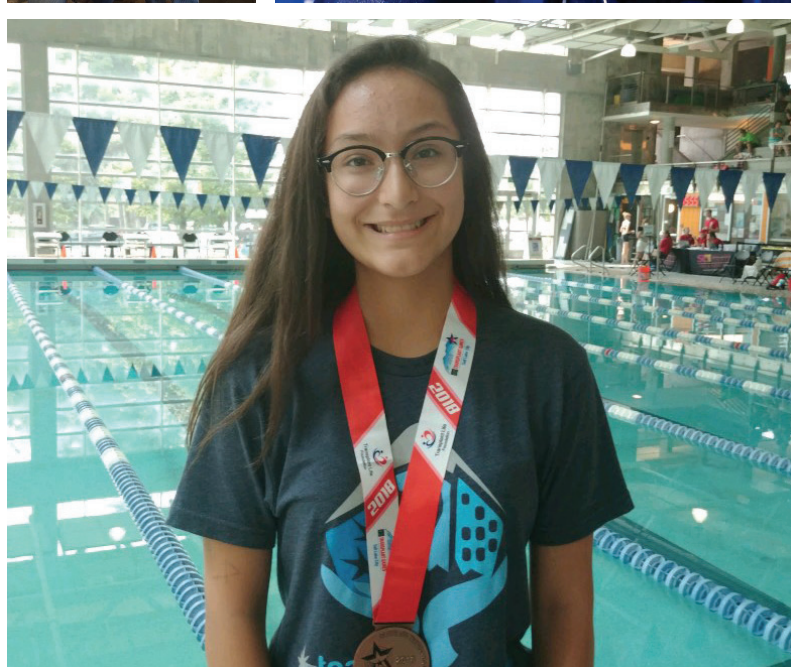

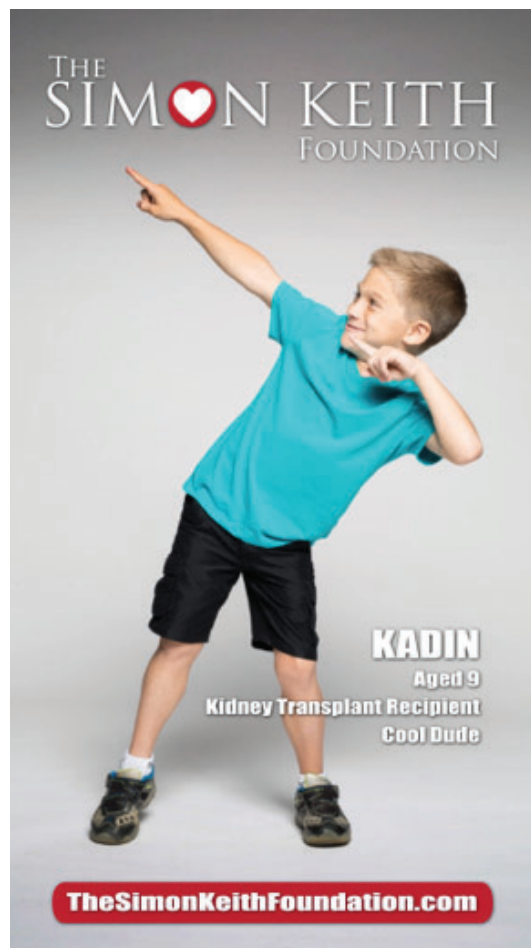

RAISED AND DIRECTED TO HELPING FAMILIES
AND RAISING ORGAN DONOR AWARENESS

MISSION STATEMENT

The Simon Keith Foundation is dedicated to providing financial support primarily to youths who have undergone a life-saving organ transplant who desire a return to an active and healthy lifestyle. In addition to helping people with their non-medical expenses, the Foundation strives to increase organ donor registration through public awareness campaigns.

THE
SIMON KEITH
FOUNDATION

October 5th, 2018

Thank you for your participation in the 5th Annual Simon Keith Foundation Golf Tournament. It is incredibly humbling and satisfying for us all that it has been just five short years, and we find ourselves here today having successfully raised and driven more than One Million Dollars directly into our mission!

The Simon Keith Foundation has two objectives. First and foremost, our goal is to support the kids. We have a tremendous amount of respect and empathy for those courageous, inspiring and resilient kids who have the courage to continue to fight through everything that having a transplant entails. It is not an easy road, but I can assure you, any recipient that is fortunate enough to receive this lifesaving gift wouldn't trade it for anything.

Through your generous support, we have helped hundreds and hundreds of kids. From paying for gym memberships, to buying drum sets; from sending kids to overnight camps, to getting kids back and active in their sport or activity of their choice, the SKF plays an integral part in each recipient's process. Our passion lies in helping these kids believe that they can be active and healthy again. The kids continue to be our driving inspiration.

Our second objective is to raise organ donor awareness. This includes increasing awareness, getting more people to talk and register as organ, eye and tissue donors and ultimately saving more lives. The advent of technology – like being able to register in the USA directly on the Apple iPhone Health App – has led to great strides and increases in both the US and Canada. In fact, did you know that the state of Nevada recovers and transplants more organs per capita than anywhere else in the USA and most likely the world? This is primarily the work of the Nevada Donor Network – the Nevada based organ procurement organization – of which I have the privilege of acting as their Chief Operating Officer. However, like any great accomplishment, it takes a multitude of people and organizations to achieve such results, and we like to think that the SKF has played a small part in that success.

Our support has come from three primary sources. The Engelstad Family Foundation has been the anchor of our organization. Their trust and vision of us has allowed the SKF to grow and flourish. They are true transformational philanthropists, and we are honored to be their partner. Our second source has been the support of my fellow Canadians. The support we receive from Canada (and primarily from my hometown of Victoria, British Columbia) is incredible. This group of generous, happy, polite, beer drinking, loyal friends from Canada have been influential in the growth of the SKF. And third, the support we receive from the USA, primarily Las Vegas and its communities, shows the world that there is no other city quite like 'Vegas'. Inevitably, if you ask someone in Las Vegas to help your cause, the answer is a resounding 'Yes'. Las Vegas is an incredible community to call home.

To our sponsors, board members, supporters, friends and everyone involved in our organization, we remain deeply and sincerely thankful. Your support and trust of us is simply overwhelming.

And most importantly, to our donors and donor families. All recipients – kids and otherwise – are so extremely grateful for a second chance at life that any temporary pain and anguish pales in comparison. The gift from our heroic donors and donor families is simply the greatest gift that one human being can bestow upon another. On behalf of all recipients I can say, we remain forever and eternally grateful.

The Simon Keith Foundation is committed to advancing its mission and serving those children and families in need. We remain humble in our cause, but also very ambitious as we look forward to the next five years.

Thank you!!

Simon

HOW IT ALL STARTED

*the story of a book
and a kid named Chris*

Chris' first competitive soccer game after not playing for most of his life 'due to his health concerns.'

Chris Rodriguez is 12. We first met Chris when he was 8 and he has been our inspiration ever since. Chris received a heart transplant at 18 months old and hasn't looked back since. An active, smart, soccer loving kid, Chris captured our hearts and became our first of many, many kids we have supported.

I have never met an athlete who overcame Simon's circumstances. To say the odds of playing soccer again were overwhelming doesn't even begin to explain what he did.

— STEVEN NASH 2 Time NBA MVP and Basketball Hall of Fame inductee, 2018

FAMILY SUPPORT

In 2018, The Simon Keith Foundation sponsored every kid in the USA and CANADA who had a desire to attend their countries Transplant Games. A hugely impactful initiative, we are dedicated to continuing with this program for years to come.

White House Organ Summit

The White House will host a Summit to answer the President's call to action to reduce the waiting list for organ transplants. This event will highlight the role of science, technology, and innovation in organ donation and transplantation, discuss the challenges we face, and discuss efforts aimed at reducing the organ transplant waiting list.

OUR SPONSORS

THE McADAMS FOUNDATION In 1985, when Simon was first stricken with cardiomyopathy, Rob and Bette McAdams and the McAdams Foundation was there to support him. Since that day, Simon has been inspired by them and vowed one day to pay their support forward. The McAdams Foundation out of Victoria BC, quietly continues to support not only Simon, but many, many more kids and families. They are our guiding light as we strive to deliver to other families the support and love they showed ours in our time of need.

THE ENGELSTAD FAMILY FOUNDATION has been a major benefactor in the creation of the Simon Keith Foundation. Kris Engelstad-McGarry, Betty Engelstad, and families have shown great trust in us and we pledge to never let them down as we support families and raise awareness for organ, eye and tissue donation.

ORGAN DONATION AND TRANSPLANTATION

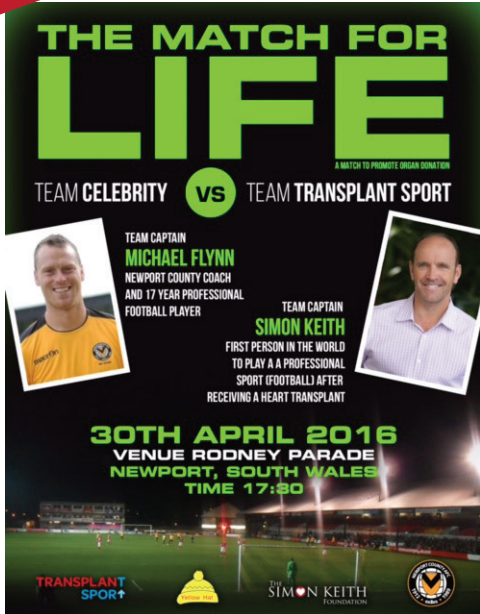

in the USA, Canada and around the world

Jonathan or, 'Groves' as he was known, was a gregarious, spirited, much-loved young 17-year-old in Newport, Wales when cruelly his life was cut short. Playing Football (soccer) at the local park with his mates, Groves collapsed from a brain aneurysm. Later that day, Jonathan's family including father Roger made the courage decision to donate Jonathan's organs. Simon's life was saved. To say that we are in deep gratitude to this family is an understatement. All donors and donor families are heroic in the choice to give life during, in many cases, a horrific tragedy. All recipients are eternally grateful.

Without the donor, there is no story. There is on hope and there is no life. Help us by registering your wishes today.

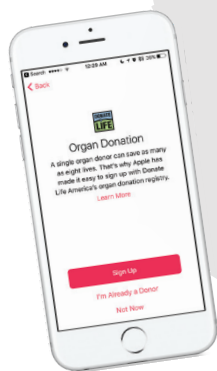

Jonathan Edward Groves
April 3, 1967 – July 7, 1986

OUR DEEPEST FEAR

Our deepest fear is not that we are inadequate. Our deepest fear is that we are powerful beyond measure. It is our light, not our darkness that most frightens us...Your playing small does not serve the world. There is nothing enlightened about shrinking so that other people won't feel insecure around you. We are all meant to shine, as children do...It's not just in some of us; it's in everyone. And as we let our own light shine, we unconsciously give other people permission to do the same. As we are liberated from our own fear, our presence automatically liberates others."

Marianne Williamson
